

Peer Teaching : A post – reading activity

Steps:

- Have each student (or pair) **choose 2- 3 words** that they are unfamiliar with. (Students should be instructed to learn the words that *affect their understanding of the questions in the text or prevent them from having the correct answers*)
- Encourage students to **contextualize unknown words** and guess their meanings in context (alone or in pairs)
- Have each student (or pair) **define their words** and write out each definition ***in their own words***.
- **Send students to new pairs/** groups and tell them to teach their words to new friends so they can learn from each other.
- The teacher **confirms or draws their attention to the text** to give the exact definition.
